SUMMARY

UC San Diego Mathematics and Computer Science student (3.9 GPA) with 3+ years of game development experience across game design and programming. Proficient in C++, C#, and Unity, with project experience in 3D user interaction, VR development, and Roblox Studio/Lua. Developed 10+ titles across game jams, coursework, and personal projects, seeking to bring strong technical foundations to full-length games.

EDUCATION

University of California, San Diego Expected June 2027
Bachelor of Science in Mathematics - Computer Science GPA 3.90

- Relevant Coursework: Honors Linear Algebra, Systems Programming and Software Tools, Advanced Data Structures, Design & Analysis of Algorithms, Software Engineering, Computer Graphics, 3D User Interaction & VR

SKILLS

Languages: C++, C#, Lua, Java, C, Python, TypeScript, JavaScript, HTML/CSS
Engines & Developer Tools: Unity, Roblox Studio, Godot, Git, GitHub, VS Code, Blender
Spoken Languages: English (Native), Japanese (Intermediate) [Japanese Portfolio], Chinese (Basic)

RELEVANT PROJECTS

Thalassophobia (Roblox Jumpstart Project) June 2026 - Present

- Co-developing a Roblox submarine horror experience selected for the official Roblox Jumpstart Program.
- Designed core gameplay mechanics and technical specifications for early-stage project development.
- Programmed minigame prototypes by integrating custom gameplay logic into existing frameworks.

Immoral Gray (2.5D Tactical RPG) June 2026 - Sept. 2026
Programming Lead, Game Designer, UI Programmer

- Led a 3-person engineering team using weekly Agile/Scrum sprints, running sprint planning and code reviews.
- Programmed player attack mechanics and a custom tile-matching minigame in Unity using C#.
- Built modular UI systems using Unity's UI Toolkit, utilizing UXML and USS for clean layout architecture.

InvestigAIte (3D VR Crime Scene Investigation Game) May 2026 - June 2026
Lead Game Designer & Gameplay Programmer | [Demo Video]

- Designed narrative arc and VR interactions for an AI murder mystery experience on Meta Quest 3 (Unity/C#).
- Programmed NPC autonomous patrol logic, gesture animations, and 3D spatial wayfinding.
- Collaborated on integrating real-time voice recognition, LLM dialog systems, and dynamic facial expressions.

Invocation Interns (3D VR Puzzle Game) June 2025 - July 2025
VR Software Engineering Intern & Lead Designer | MAVERiC Studio Internship | [Portfolio Page]

- Developed an experience for a live off-site San Diego Comic-Con exhibition at MAVERiC Studio's *The Night Market.*
- Designed 5 interactive puzzles and built C# mechanics for object manipulation, teleportation, and state validation.
- Engineered immersive environmental feedback using Unity spatial audio and particle systems.

EXPERIENCE

Roblox Club at UC San Diego July 2025 - Present
VP of Finance & Founding Officer | [Club Website, Instagram Page]

- Co-founded the club and scaled active event attendance from 15 to 120+ members within 5 months.
- Lead a finance team securing $400+ per event via university grants and raising $300+ in local business fundraisers.
- Build and maintain automated spreadsheets to track budgets, membership metrics, and operational workflows.
- Direct officer recruitment interviews, venue logistics, and campus regulatory compliance.
